

High functioning/High performance Digital Force Gauge ZT Series Sensor Separate Model

Sensor separate model of high performance digital force gauge ZT series

Wide range of load cell to fit various measuring environment

Various data output for external equipment controlling

Use with...

DPU series load cell to mount on equipment.

LM series load cell for measuring in limited space.

WP series load cell for measuring in wet environment.

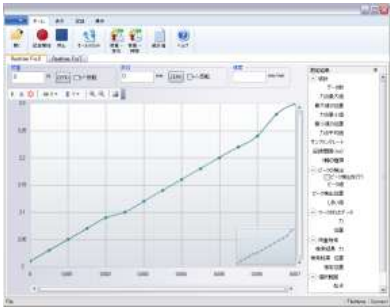

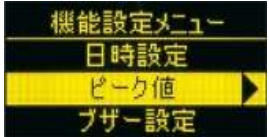

DM series load cell for measuring the force between the closing automatic doors.

*LEFT: ZTA with DPU-50N

*Calibration is necessary every time when you change load cells.

[Features]

Fast Sampling & Accurate Results	Direct data storing to USB	Clear Display
Fast sampling speed of max. 2000 data/sec and fast USB connection provides smooth graph drawing. (Optional software required)	Saving continuous data directly in USB memory stick (ZTA series only)	Bright Organic EL display shows multiple values (date and time, the number of memory, comparator value and more.)
		 

[ZT series Specifications]

You can select from 2 types (ZTA or ZTS) in accordance with your use.

Model	ZTA	ZTS
Feature	Advanced model with various functions such as data saving in USB memory stick, displacement I/O and more.	Standard model with the same benefit in performance as ZTA series but reduced functions.
Accuracy	+/-0.2%F.S./+/-1digit	
Unit of measurement(*1)	N, kgf, lbf (*2)	
Display	4-digit Organic EL	
Display update	10 / sec	
Sampling rate	2000 / sec at maximum (*3)	
Battery	8 hours (8 hours charge)	
Safe overload rating	Approx.200%F.S.	
Operating environment	Temperature: 0 to +40 degree Celsius Humidity: 20 to 80%RH	
Function	Customized display (header and footer), Peak hold (tension and compression), Internal 1000 points data memory, Comparator (judgment of OK or NG), Reversible display, Sign inversion, Zero clear timer, +NG alarm, Off timer (auto power off), Dumping, Calendar display	
	1 st /2 nd peak, Displacement detection at force peak, Displacement 0 reset at selected force	-
Output	USB, RS232C, Mitutoyo digimatic (*4), 2 VDC analog output (D/A), Comparator 3 steps (-NG/OK/+NG)	
	Sub comparator 2 steps (output of large or small judgment)	-
Overload warning	Approx.110%F.S. (Warning message and alarm)	
External connecting switch	SEND (a point of contact holding), Zero reset, Peak ON/OFF setting	
Weight	From 2N to 1000N model: Approx.490g (*5) 2500N, 5000N: Approx. 1100g (*5)	
Dimensions	Please refer to dimensions.	
Accessory(*6)	AC adapter, Inspection certificate, CD driver (including simple software for data log), Attachments (The set of attachments varies according to range.), USB cable, Carrying case.	
	Adapter for USB memory stick	-

*1 This is the specifications for international model. Please note that available unit is different from Japanese domestic model and international one.

*2 [N indication] The indication of 2N and 5N models is mN or N. The indication of 1000N,2500N and 5000N model is N or kN.
[kgf indication] The indication of 2N and 5N models is gf. [lbf indication] The indication of 2N and 5N models is ozf.

*3 When you save data in USB memory stick, the sampling rate is 100/sec.

*4 It is not always available for Mitutoyo digimatic products.

*5 Weight is slightly different according to range.

*6 USB memory stick is not included.

[Sensor Separate Models]

Select a display and a sensor;

Example of combination:

Display + Sensor (Load cell)	Model
ZTA series + DPU-50N	ZTA-DPU-50N
ZTS series + LM-2000N	ZTS-LM-2000N

Next page: Range list of some load cells >>>

[DPU Models]

Model		Capacity	Display	Resolution
ZTA-DPU-2N	ZTS-DPU-2N	2N(200gf)	2.000N/2000mN(200.0gf)	0.001N/1mN(0.1gf)
ZTA-DPU-5N	ZTS-DPU-5N	5N(500gf)	5.000N/5000mN(500.0gf)	0.001N/1mN(0.1gf)
ZTA-DPU-10N	ZTS-DPU-10N	10N(1kgf)	10.00N(1.000kgf)	0.01N(0.001kgf)

[Option]

Option	Explanation	Model
<p>Analog voltage (Sensor raw data)</p>	<p>To output sensor data as fast analog voltage without conversion. *The speed is higher than D/A (standard), but there are demerits at the same time that zero reset is not possible, and there are many noises. *CB-118 cable is necessary.</p>	<p>-AN</p>

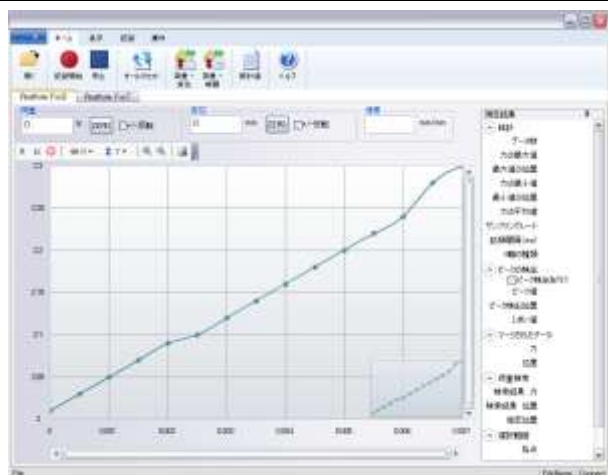

[Application of Force Gauge]

ZT series enable

1. Controlling external equipment according to force value. (e.g. To stop or change operation of machine at selected force value.)
 2. Adding load at a certain force value. (e.g. To hold down sample at a certain force value.)
 3. Producing inspection device synchronized with work process. (e.g. To improving efficiency of inspection process.)
 4. Finding inferior goods earlier with comparator (judgment of acceptance or rejection) function.(e.g. To do quality control thoroughly)

[Related Products]

Graphing Software: Force-Recorder

*The image is one under developing.

You can select from 3 grades.

Main functions	Professional	Standard	Light
Force-time graphing Sampling rate: Max. 2000/sec	✓	✓	✓
Force gauge function setting	✓	✓	✓
Data storage in CSV format	✓	✓	✓
5 graphs at maximum can be displayed in a table	✓	✓	N/A
Force-displacement graphing	✓	N/A	N/A

*Professional version needs ZTA and a test stand with linear scale.

*Please refer to each specifications for more information.

Printer:DP-1VR	Optional Handles: FOH-1	Battery: BP-308
Prints indicated values and data in internal memory. CB-308 cable is necessary.	You can grip handles firmly so it becomes easier to apply high load force steadily.	Battery for replacement.

[Related Cable]

Model	Explanation	Purpose of use
CB-108	Analog cable	To connect multi meter, oscilloscope.
CB-118	Analog cable (For -AN option)	To connect multi meter, oscilloscope.
CB-208	RS232C cable	To connect PC having its own system
CB-308	Digimatic cable	To connect printer DP-1VR
CB-508	Test stand option cable (For MX)	To connect a test stand to enable force control or overload prevention functions.
CB-518	Test stand option cable (For MX2,EMX)	To connect a test stand to enable force control or overload prevention functions.
CB-718	Test stand connection cable for displacement measurement (For MX2-FA)	To connect a test stand having length meter to enable force-displacement measurement.
CB-728	Test stand connection cable for displacement measurement (For EMX-FA)	To connect a test stand having length meter to enable force-displacement measurement.
CB-908	Open end connection cable	Output cable for loose wire 37 pin (Useful for connection with unique equipment.)

[Dimensions: Display]

* Please see the specifications of each load cell for its dimensions.

[Calibration Certificate]

We offer calibration certificate at extra charge.
